Subject: Agenda for today's SDDL remedial call

Adam and all,

On today's call I'd like to discuss the following issues raised by the OU2 scoping document:

1. Overall plan for progression of OU2 RIFS activities & how the scoping document fits in.

Tasks prior to developing workplans:

- ✓ Evaluate existing data
- ✓ Develop CSM
- ✓ Identify OUs
- ✓ Identify PRAOs and likely response scenarios
- ✓ Begin preliminary ARAR identification
- Identify initial DQOs

Key questions:

- What is the nature and extent of ...
 - ...the fill in OU2?
 - ...site-related soil contamination in OU2?
 - ...site-related sediment contamination in OU2?
 - ...site-related surface water contamination in OU2?
 - ...site-related groundwater contamination in OU2?
 - ...site-related soil vapor in OU2?
- Does the (insert the medium of concern) pose unacceptable risks to human health and the environment? (Related: does the (insert medium of concern) act as a source/transport mechanism for contamination to another medium?)
- What remedial actions would address those risks/source area(s)? (May need to collect additional data to develop remedial alternatives).

2. Conceptual site model

3. DQO tables 3.1-3.6

4. Other issues/next steps
